Re: Pilgrim Communications, Inc.
KRCN, Longmont, CO
Facility ID No.: 70625
File No.: BP-20061106AAY

Dear Applicant:

This is in reference to the above-captioned minor change application filed by AM station KRCN, Longmont, Colorado, to relocate its transmitter site location.

On April 10, 2007, the staff sent a deficiency letter requesting additional information. The information is needed in order to process the application.¹ On May 7, 2007, the station attorney, John Trent, sent an email requesting additional 30 days to respond. As to this date, we have not received the requested amendment.

Accordingly, the application (File No. BP-20061106AAY) IS HEREBY DISMISSED as patently defective. This action is taken pursuant to Section 0.283 of the Commission's rules.

In the Public Notice entitled "Commission States Future Policy on Incomplete and Patently Defective AM and FM Construction Permit Applications", FCC 84-366, released August 2, 1984, the Commission indicated that it would reinstate applications nunc pro tunc where the original application was returned and where a relatively minor curative amendment was filed in conjunction with a petition for reconsideration within 30 days of the date of the dismissal. Any amendment filed later than 30 days will be returned as untimely. See 47 U.S.C. § 405, 47 CFR § 1.106(f). In this regard, it should be emphasized that the above deficiencies were discerned after a preliminary study of the application. A detailed review was not made of the entire application to determine whether other deficiencies exist which would preclude acceptance for filing or result in a subsequent dismissal. Inasmuch

¹ The staff requested an amendment to provide an explicit quantitative formula for the skywave characteristic $f(\Theta)$ as required by Section 73.160(c) of the Commission's Rules. This formula must be accompanied by a complete derivation of sample calculations.

as the applicant will not be afforded a second opportunity to correct another deficiency, the applicant is encouraged to carefully review the entire application.

Sincerely,

Son Nguyen
